DETAILED ACTION

Allowable Subject Matter

Claims 1-25 are allowed in view of the prior art.

The following is an examiner's statement of reasons for allowance:

As for claims 1, 13, and 17, the prior art of record, taken either alone or in combination, fails to disclose or render obvious a rotary position measuring system, in combination with the rest of the limitations of the above claims.

With further regard to the above claims, the applicants' arguments dated September 24, 2004 lay out detailed reasons for the allowability of the claims in view of the prior art. In particular, the prior art fails to disclose an apparatus wherein the light is transmitted by a graduation of the measuring graduation structure of the device, and once the light is reflected off the scanning graduation structure, the light is then transmitted through the same graduation of the measuring graduation structure that is transmitted through initially, in combination with the rest of the elements and limitations of the corresponding claims.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Michael A. Lyons whose telephone number is 571-272-2420. The examiner can normally be reached on Monday through Friday.
